

1/23/70

Dear Dick,

Your 3-M copy of the two 399 pix and note on reverse arrived today. I have marked the comparison in red and return it herewith. I believe that lighting does not account the what I take to be a new piece missing in the R photo. It is other than what you marked.

The roughly parallel lines are drawn in to limit to this particular area in your eye.

Nothing really new. That we continue with your kind of weather without your kind of preparation and adjustment is no longer new.

Best,
